

**STEP 1.** Open your Internet browser (Internet Explorer recommended) and double click the icon.

**STEP 4.** Select and click the **VEHICLES** button from the main menu, then select and click the **Group** you would like to perform commands on. Then select and click the serial number of the **GoldStar** device you would like to communicate with.

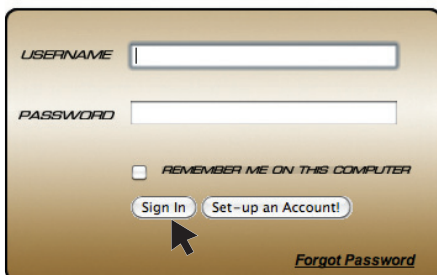

**STEP 2.** In the address bar, type the following URL: [www.goldstargps.com](http://www.goldstargps.com) and click "GO." Then, click on the "GO" button next to **Client Login** in the upper right corner of the site.

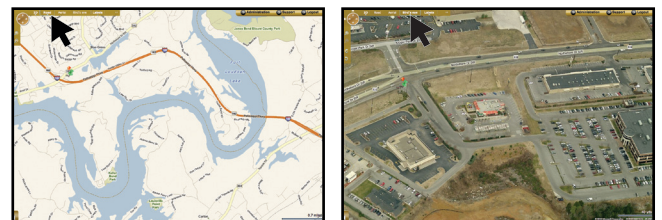

**STEP 5.** To perform a **Locate** on the vehicle, click the **Locate** button.

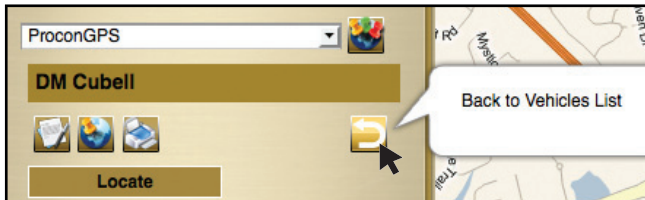

**STEP 3.** Enter supplied **Username** and **Password** and click "SIGN IN."

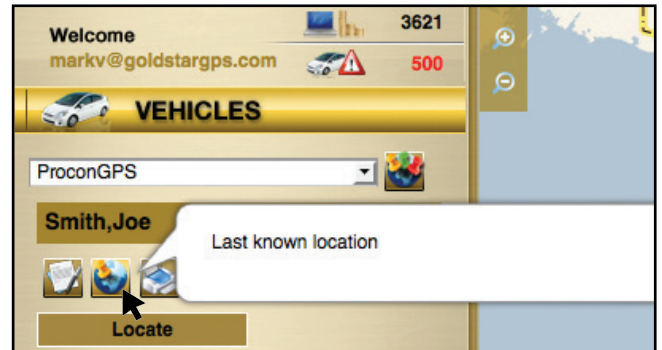

**STEP 6.** Once the vehicle has been located, you can choose to see its location in multiple views. Select between **Road**, **Aerial** and **Bird's eye** by clicking the appropriate option at the top of the map screen.

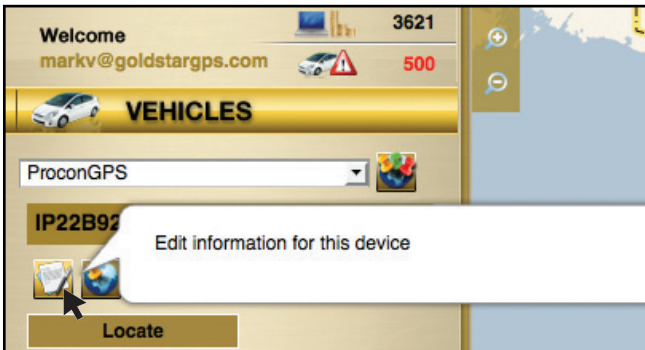

**STEP 7.** To return to the list of vehicles, click on the **Back to Vehicles List** button.

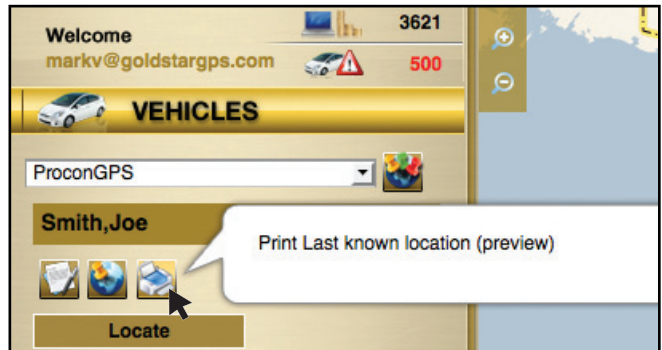

**STEP 10.** To View the last known location, click the **Last Known Location** button.

**STEP 8.** To edit your device description, click the **Edit information for this device** button.

**STEP 11.** To print out the last know location, click the **Print Last Known Location (preview)** button.

**STEP 9.** Fill out the **Vehicle Profile** information and click save.
